James Dundon came in from Cerbat this morning.

Mrs. Alice Bowers left for California the first of the week.

George Warren has gone to Los Angeles on a month's vacation.

Mrs. Lew Blakely has been visiting relatives at Signal this week.

Charles Gracey is working fourteen men on the Techicup mine, at El dorado Canyon.

J. H. Book visited the Cerbat section this week and made an examination of mining property.

J. C. Noble, who owns valuable mining property in the Cerbat section, is in Kingman.

Senator J. E. Perry visited the branch store of Gaddis & Perry company at Yucca this week.

Supervisor Stephens came up from his home on the Big Sandy last night. He reports fat cattle in that section.

Lew Blakely came over from the Ramrod mine a few days ago and went out to Union Pass to look at a mining proposition.

W. E. Hart and wife, of Winslow, have taken up their residence in Kingman, where Mr. Hart has opened a tailoring establishment.

A contract to sink fifty feet has been let on the mine of Sandy Harris, near Eldorado Canyon. The ore in the bottom of the shaft is said to be very rich.

It is reported that a large party of eastern gentlemen will soon visit the Stockton Hill section to look over the mines of the Arizona-Mexican mining company.

R. Nickel, who has been on the sick list in Kingman for a week or more, departed to the Cyclopic mines a few days ago, where he has charge of work on that property.

A new wagon road in the canyon south of Kingman has been made by the board of supervisors. The road cuts out the dangerous part of the canyon bed and makes travel much safer.

The dead body of a Mexican was found near the water tank at Hancock, seven miles south of Kingman, today. The man had evidently been dead several days, but nothing could be learned regarding the matter.

John Denair visited the Chloride section last Thursday, on business connected with the railroad company. He also looked at several mines. Mr. Denair is interested in the growth and prosperity of this county and always has a good word to say of its mines.

Large amount of material and supplies are being hauled from here to the Vivian country. The German-American company is having carloads of lumber and timber hauled out to their property. All the other properties are being supplied with fuel oil and other necessary supplies from this place.

Sumner Beecher and George Taylor are over in Eldorado Canyon, where they located several fractions on the rich veins of Sandy Harris' and others, near that place. They are now at work sinking a fifty foot contract for Harris and will do considerable work on their own properties.

In the distribution of the territorial school fund Mohave county gets 250,508. This apportionment of school moneys is the smallest of any county in the territory, Mohave showing up only 334 children. The fact that Mohave is essentially a mining county is responsible for the small showing in the number of children, few miners being endowed with families.

Frank Dunham and Mr. Grasty, of Los Angeles, arrived in Kingman a few days ago and have been looking at the old Fay mine, south of town. Mr. Dunham has taken this property over and will at once let a contract to sink 50 feet, after which a plant will be installed on it and further work prosecuted. The mine shows up splendid values for a considerable depth, and along the outcrop of the vein the ore will average nearly two ounces gold to the ton.

Judge W. G. Blakely visited Topock this week on business.

A number of companies are working mines in the Bill Williams Fork country and getting good results. These mines carry large values in copper and many of them are rich in gold.

The river at Needles is fast encroaching on the bank and so far this spring a large area has gone down into the stream. The big pole of the telephone system was taken out early in the week and the pump station of the Mohave & Milltown railroad company had to be removed to safer quarters. It is probable that the whole of the bend in the river at that point will be cut off.

George A. Bonelli returned from Bonelli Ferry last Saturday, where he was looking after affairs in which he is interested. He was prevented from returning sooner by the high water of the Colorado river, the waves for two days rolling to twenty feet in height. It is thought that the condition of the river was caused by the floods in the Little Colorado.

J. P. Storm, who was indicted for the embezzlement of treasury funds of Yavapai county, was acquitted by a jury at Prescott yesterday. The trial had been on for twelve days. On the 8th of last November Storm alleged that he had been held up by two men, his safe robbed and he was bound and thrown into the vault, where he was found the next morning. It transpired that Storm was seen on the street at an hour long after the alleged holdup and many questionable acts were proven against him. He had many friends in the county and it was at all times thought to be impossible to get a conviction against him.

Henry Lovin has remodeled the Kingman Ice Plant until now it is one of the most up to date manufacturing on the Pacific coast. Large cooling rooms have been added to the plant's capacity, big ice chambers have been built and everything possible has been done to make the works convenient and economical. Every variety of non-alcoholic drinks are prepared and kept on hand. A specialty is made of Puritas water, which will be delivered to families at fifty cents for five gallons. This water has all the organic impurities removed and is the best drinking water that can be used. No family should be without it and its cost places it within the reach of all. The plant is now making about three tons of ice daily.

If you are in need of a suit or pair of pants, call on W. E. Hart, Merchant Tailor, located in I. M. George building, 4th street.

Don't overlook the fact that Lovin & Withers carry furniture, mattresses, stoves, tinware, heavy and shelf hardware, etc., and can set you up in house-keeping in elegant style. And the prices will suit you.

If your old clothes look grimy bring them to me and I will make them look like new. I have the latest cleaning process. Located in I. M. George building, 4th street. W. E. HART, Merchant Tailor.

The Cyclopic mine is now connected by telephone with Kingman.

A number of men were arrested this week on a charge of violating the injunction, which was recently issued by Judge Sloan, restraining all persons from interfering with the working of the German-American, Gold Dust and other properties in that section. Three of the men were arrested at Gold Basin and one at Vivian. They were taken to Prescott, where they will have a hearing before Judge Sloan.

LATER—L. E. Paehlig was found guilty of violating the injunction of the court and fined thirty dollars, and Roy Courtwright was fined in the sum of fifty dollars. The other defendants were discharged. The men may serve the fine out at the rate of two dollars per day.

M. W. Hinkle, of Mineral Park, one of the pioneers of the county, was brought to Kingman a few days ago and will hereafter reside here. Mr. Hinkle has been in failing health for several years and is now unable to aid himself in any way. His long and useful life in the county ought to be rewarded by a comfortable home the balance of his days.

J. A. Marshall died in Los Angeles last Monday of a complication of diseases. His body was shipped to Flagstaff, where the funeral took place Wednesday. Mr. Marshall was an old resident of the territory and at one time represented Coconino county in the legislature. For several years he resided at Hackberry, but after selling some mining property about a year ago, removed to Los Angeles. He was a bright man and had many warm friends in this territory and California, who will hear of his death with sincere regret.

Several machine drills are at work on the big ledge of rock in the canyon south of Kingman, where the railroad company is blasting out a new water way. The big ledge of rock projects into the canyon for some distance and directs the flood waters against the railroad grade, having caused the big washouts of last summer. It is proposed to straighten the canyon by blasting away this rocky point and use the rock in rip rapping the grade at necessary places. A large number of men are employed in the work. It is expected that it will take several months to complete this work.

We receive fresh vegetables daily from the Rosenberg ranch, on the Colorado river. None better were ever brought to the Kingman market. LOVIN & WITHERS.

A recent Washington dispatch says that bids will be opened June 15 at Los Angeles on revised specifications for the Laguna dam and sluiceway of the Yuma project. The specifications call for the excavation of about 282,000 cubic yards of earth, about 345,000 cubic yards of solid rock, the placing of about 305,000 cubic yards of solid rock in the dam and masonry core walls, the building of 27,150 cubic yards of concrete, laying 80,000 square yards of paving, and furnishing and driving 53,000 linear feet of sheet piling.

Excursion Rates to California.

Date of sale—Every Tuesday, Thursday and Saturday during months of May, June, July, August and September, 1905. Tickets continuous passage east of Barstow, both directions, final limit November 31. For further information call on Agent Gooding.

Man is the only creature that knows that he will die. Yet he is the only creature that laughs. He is the only creature that manifests joy in his existence. It is hard to understand. Every rational man knows that he has no mortgage on tomorrow. It is not his. He may never see it; he may die before dark. Few let the dark shadow of this unchangeable fact fall athwart their path. They laugh and are gay even when their heads are greyed for the grave. They hasten to a future of which the wise have as shadowy knowledge as the fool. This future is forever, and is said to be influenced for eternity by our conduct here. Yet this is nearly the only fact that man is careless about. It is a mystery.—Ex.

Lovin & Withers have just opened up one of the largest lines of men's furnishing goods ever brought to Mohave county. The counters and shelves of the big store are crowded to overflowing and everybody should take a look at the display and make their purchases while goods are new and fresh.

Growing Aches and Pains.

Mrs. Josie Sumner, Bremont, Texas, writes, April 15, 1902: "I have used Ballard's Snow Liniment in my family for three years. I would not be without it in the house. I have used it on my little girl for growing pains and aches in her knees. It cured her right away. I have also used it for frost bitten feet, very good success. 'It is the best liniment I ever used.' " 25c, 50c, \$1. For sale at Watkins' drugstore.

FROM TOKIO TO BUDA PEST

(From the California Limited Log Book)

I've traveled East, I've traveled West,
 From Tokio to Buda Pest;
 Yet I can always truly say
 There's no road like the Santa Fe
 T. R. M.
 Yale Club, New York.

SANTA FE IS THE WAY

Lovin & Withers will give away one free trip to Catalina Island every month during the summer. Patrons making cash purchases will be given tickets in a drawing to be held about the first of each succeeding month and the lucky one gets the ticket.
